

camille® Venom

wrinkle eraser

The only real Camille® VENOM cream

Camille® Venom Cream enriched with SYN®-AKE (synthetic snake poison) and PEPHA®-TIGHT (micro alga) means a breakthrough in the field of the anti ageing creams.

The largest snake breeding in the world (+ 10,000 pieces) is situated in Brazil and after many years of research, they managed to imitate the peptide being present in the snake poison synthetically.

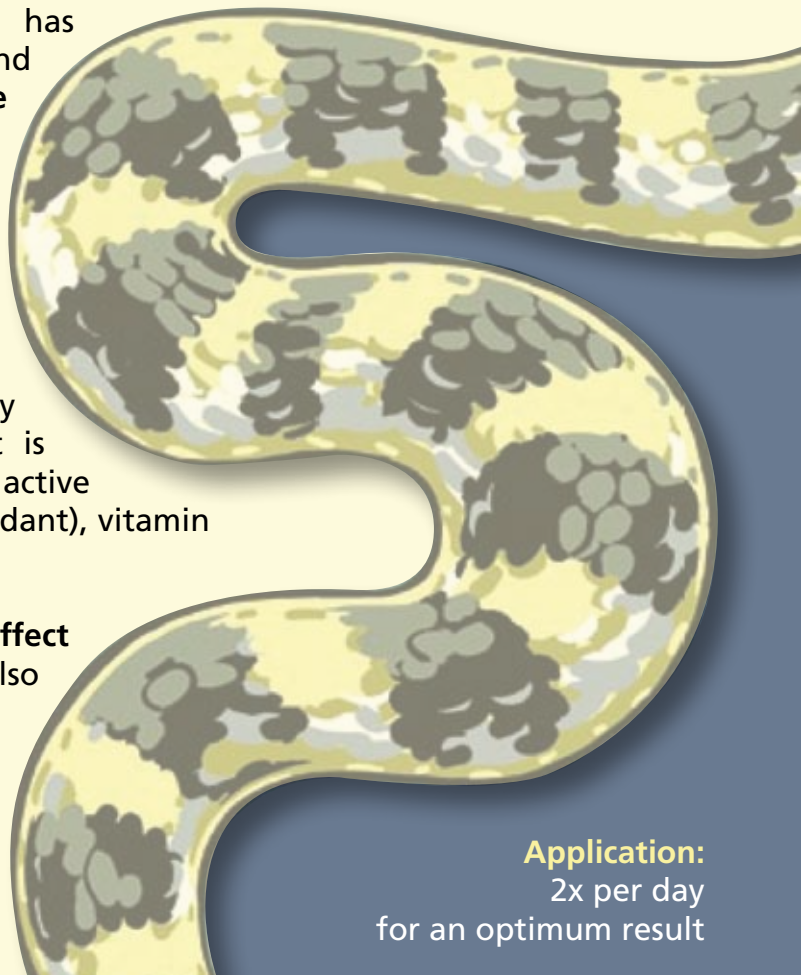

This substance – also called "SYN®-AKE", has already become a prestige price in Switzerland and therefore means a **great step forward in the world of the age killer**. The clinical tested results have proven that the application of SYN®-AKE can reduce the wrinkles with 52% within 28 days. **The effectiveness of SYN®-AKE** has been proven in vitro and in vivo tests.

Pepha®-tight is an extract of a micro alga (nannochloropsis oculata) which is produced by biotechnology (photo-bioreactor) because it is the way the **purity and high quality** of the active ingredients (polysaccharide, vitamin C (antioxidant), vitamin B12 ...) can be guaranteed

PEPHA®-TIGHT has an **instantaneous lifting effect** and protects the skin on a **long-term basis**. It also stimulates the collagen production.

This cream is suitable for women and men.

- Effects:**
- Intensive anti wrinkle cream
 - Painless smoothing of mimic wrinkles (52% upon 28 days)
 - Anti-Ageing effect
 - Lifting therapy
 - Protects the skin against free radicals
 - Protects against oxidant stress

Application:
2x per day
for an optimum result
